read in the Excel spreadsheet from Hugues

```
library(readxl)
xl.fn <- "from-Hugues-Benoit-abundundance_Crosstab_edited.xls"
hugues.df1 <- read_xls(xl.fn, sheet=1)
hugues.df2 <- read_xls(xl.fn, sheet=2, n_max = 36)

hugues.to.compare <- hugues.df2
## recode some species to match the data provided by dan
names(hugues.to.compare)[34] <- '880'
names(hugues.to.compare)[43] <- '503'
names(hugues.to.compare)[51] <- '598'
names(hugues.to.compare)[53] <- '712'
hugues.to.compare <- as.data.frame(hugues.to.compare)
```

read in the CSV file from Dan

```
csv.fn <- "sGSL-RV-data-for-Elise-2021-10-12-C-stratified-matrix.csv"
t.df <- read.csv(csv.fn)
dan.df <- as.data.frame(t(t.df[,2:51]))
names(dan.df) <- as.character(t.df[,1])
dan.df$year <- 1971:2020
species <- as.character(names(hugues.to.compare)[2:53])
dan.to.compare <- dan.df[,c("year",species)]

setdiff(names(hugues.to.compare)[2:53], names(dan.df)[1:52])
```

```
## character(0)
```

```
dim(dan.to.compare)
```

```
## [1] 50 53
```

```
dim(hugues.to.compare)
```

```
## [1] 35 53
```

compare the stratified estimates from Hugues and Dan

```
## keep only the same years
dan.to.compare <- dan.to.compare[1:35,]
```

```

dim(dan.to.compare) == dim(hugues.to.compare)

## [1] TRUE TRUE

names(dan.to.compare) == names(hugues.to.compare)

## [1] TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE
## [16] TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE
## [31] TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE
## [46] TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE TRUE

dan.matrix <- as.matrix(dan.to.compare[,2:52])
hugues.matrix <- as.matrix(hugues.to.compare[,2:52])

difference <- dan.matrix - hugues.matrix
range(difference)

## [1] -176.5167 663.7609

for(i in 1:length(species))
{
  plot(dan.to.compare[,i+1],
       hugues.to.compare[,i+1],
       main=paste0("Species ", species[i], "-", species.str(species[i])),
       type='n',
       xlab="Dan estimate", ylab="Hugues estimate")
  text(dan.to.compare[,i+1],
       hugues.to.compare[,i+1],
       dan.to.compare[,1]
       )
  abline(a=0,b=1)
}

```

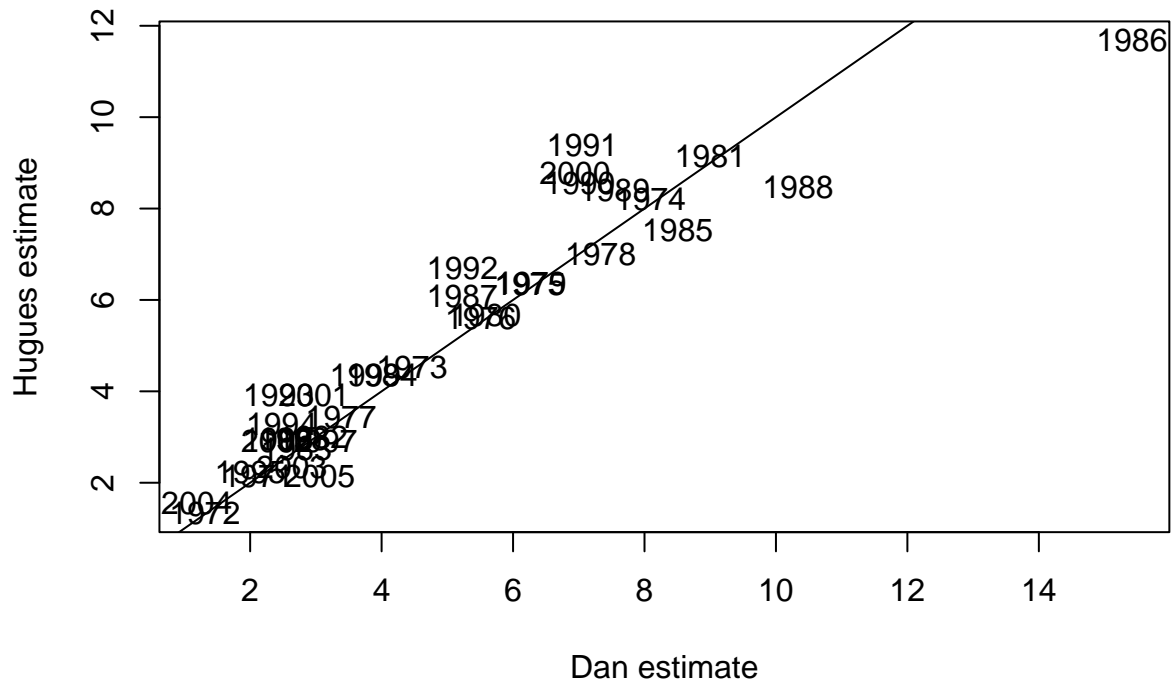

Species 10–Atlantic cod

Species 11-Haddock

Species 12-White hake

Species 14–Silver hake

Species 16–Pollock

Species 23–Redfish unidentified

Species 30–Atlantic halibut

Species 31–Greenland halibut

Species 40–American plaice

Species 41–Witch flounder

Species 42–Yellowtail flounder

Species 43–Winter flounder

Species 50–Atlantic wolffish

Species 60–Atlantic herring

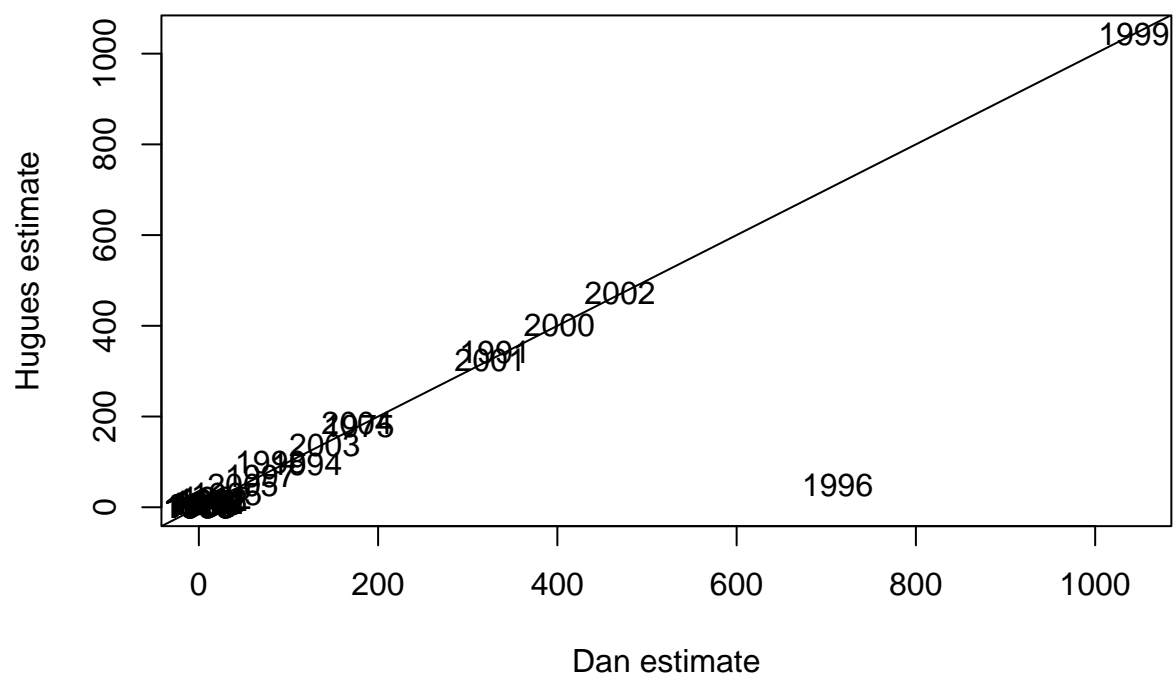

Species 62–Alewife

Species 63–Rainbow smelt

Species 64–Capelin

Species 110–Arctic cod

Species 112–Longfin hake

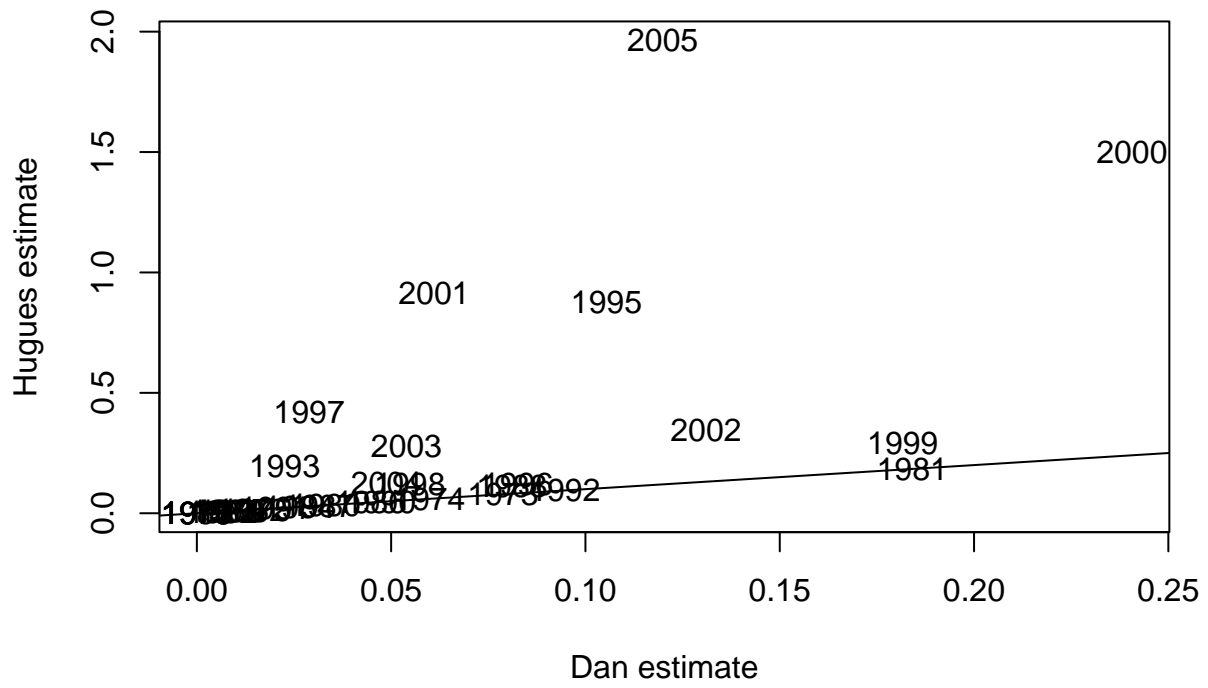

Species 114–Fourbeard rockling

Species 118–Greenland cod

Species 122-Cunner

Species 143–Windowpane flounder

Species 201–Thorny skate

Species 202–Smooth skate

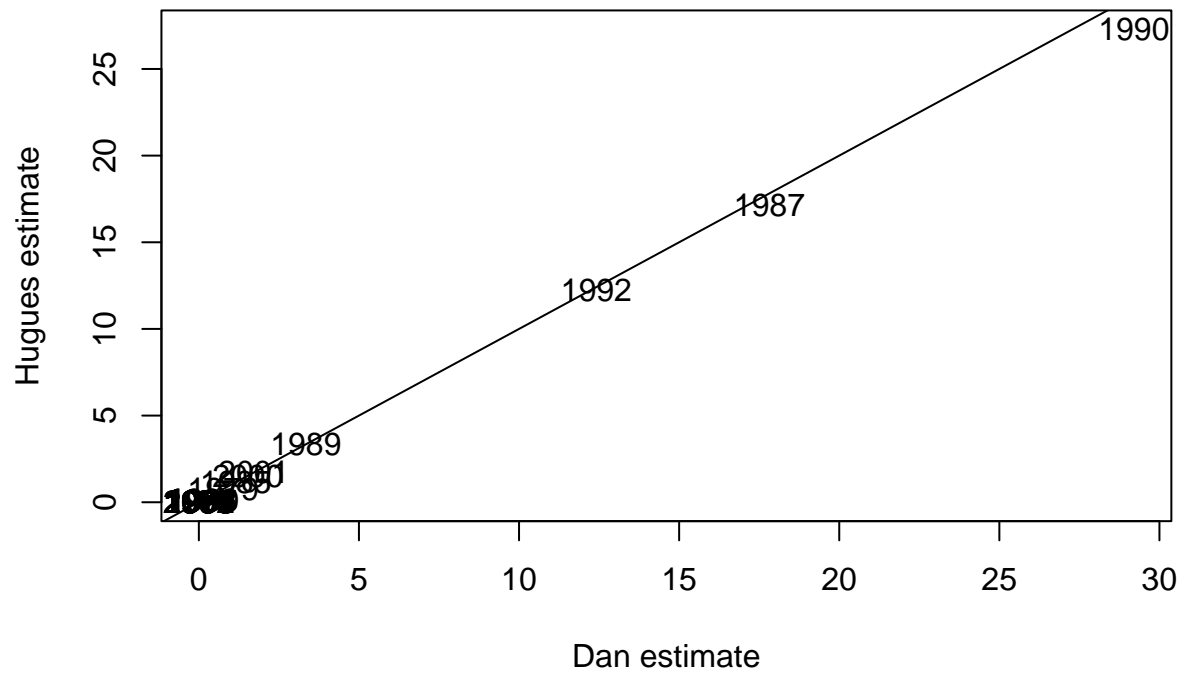

Species 204–Winter skate

Species 220–Spiny dogfish

Species 221–Black dogfish

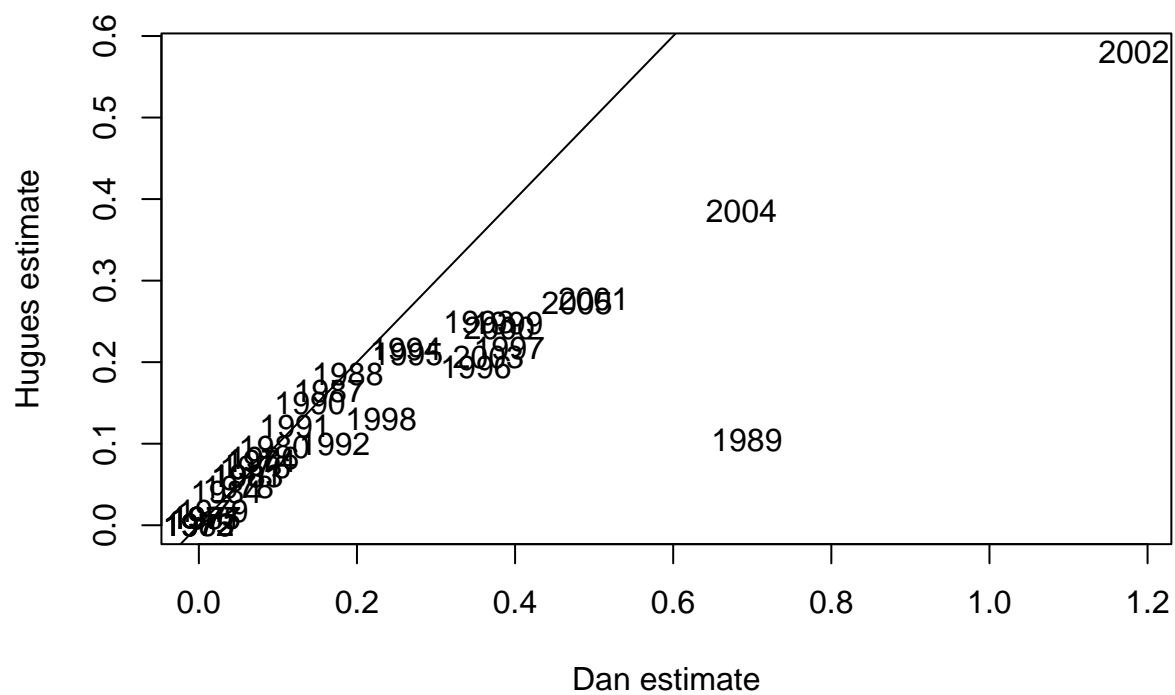

Species 241–Atlantic hagfish

Species 300–Longhorn sculpin

Species 301–Shorthorn sculpin

Species 304–Moustache sculpin

Species 880–Atlantic hookear sculpin

Species 307–Polar sculpin

Species 314–Spatulate sculpin

Species 316–Arctic sculpin

Species 320–Sea raven

Species 340–Alligatorfish

Species 350–Atlantic poacher

Species 361–Three–spined stickleback

Species 410–Marlin–spike grenadier

Species 503–Atlantic seasnail

Species 501–Lumpfish

Species 610–Northern sand lance

Species 616–Fish doctor

Species 622–Snakeblenny

Species 623–Daubed shanny

Species 624–Arctic shanny

Species 640–Ocean pout

Species 598–Eelpouts unidentified

Species 646–Atlantic soft pout

Species 712–White barracudina
